

# **Comparable Company Analysis (Comps)**

## **Investment Banking Project**

### **1. Executive Summary**

This report presents a comparable company analysis of leading Indian IT companies using commonly used valuation and financial performance metrics.

### **2. Project Objective**

Evaluate peer companies using relative valuation techniques and identify valuation differences.

### **3. Industry Overview**

The Indian IT services industry is a major contributor to exports and serves global enterprise clients across consulting, software development, cloud, AI, and digital transformation.

### **4. Companies Analyzed**

TCS, Infosys, HCLTech, Wipro, and Tech Mahindra.

### **5. Methodology**

Collected publicly available financial information, standardized key metrics, compared valuation multiples, and summarized findings.

### **6. Financial Metrics**

Revenue, EBITDA, EBITDA Margin, Net Profit, EPS, Market Capitalization, Enterprise Value, P/E Ratio, EV/EBITDA, Revenue Growth, ROE, and Debt-to-Equity.

### **7. Comparable Analysis**

Peer comparison highlights valuation premiums and discounts relative to industry averages.

### **8. Key Findings**

TCS remains the largest company by market capitalization. Infosys and HCLTech show strong profitability. Valuation should always be interpreted alongside growth and return metrics.

### **9. Risks**

Macroeconomic conditions, client spending, currency fluctuations, competition, and technology disruption can affect valuations.

### **10. Conclusion**

Comparable Company Analysis is a useful relative valuation technique and should be complemented with DCF and qualitative analysis.
